

EduNet

Your partner for international
higher education

EduNet international network of colleges and universities

Through the EduNet international higher education network, Phoenix Contact promotes interaction and cooperation between higher educational institutions and industry in the field of automation. With the help of the network, the automation technology expertise of users and manufacturers can be integrated into the teaching program.

College and university

EduNet

International Education Network –
a Phoenix Contact Initiative

Students

Industry

Synergies through collaboration

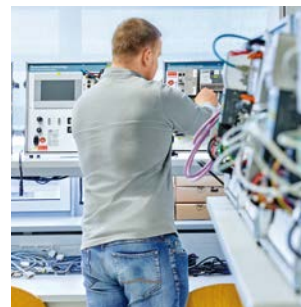

Studying in jointly designed EduNet laboratories supports students in their transition to the working world. The goal is to work together to develop educational innovations and content and to test them out in a real-world environment.

More than 900 training boards have been installed in EduNet labs throughout the world thus far. More than 10,000 students are being taught with TechEducation equipment every year.

College and university

- Practical laboratories with state-of-the-art technology
- Learning management system
- Professional conferences
- Free training sessions
- Research projects
- Future range of certified courses

Students

- Specialized training with state-of-the-art technology
- Student exchange program
- Bachelor and Master theses
- International internships
- Participation in certified courses of study

Industry

- Highly qualified graduates with current manufacturer- and user expertise
- Transfer of technologies
- Highly motivated training staff as partners
- Increased familiarity with technologies

EduNet network worldwide

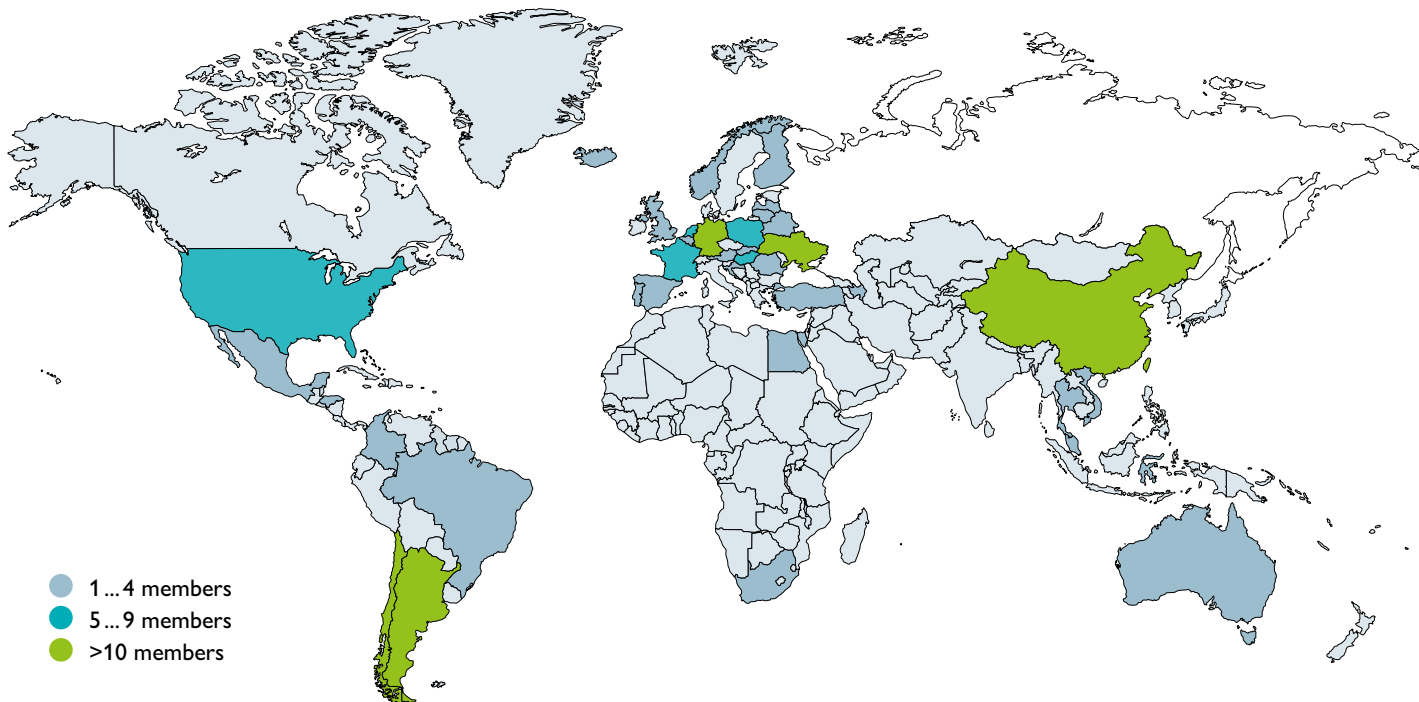

Over 150 EduNet member universities from 37 countries

Argentina	Honduras	Russia
Austria	Hungary	Singapore
Azerbaijan	Iceland	Slovakia
Belarus	Indonesia	South Africa
Belgium	Ireland	Spain
Brazil	Latvia	Turkey
Chile	Lithuania	Ukraine
China	Luxembourg	USA
Colombia	Mexico	Vietnam
Croatia	Netherlands	
Finland	Norway	
France	Poland	
Germany	Portugal	
Great Britain	Romania	

Learn more about EduNet partners

EduNet has been growing for years. Learn more about our numerous partners here:

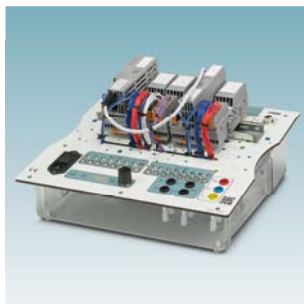

phoenixcontact.com/edunetpartners

EduNet

International Education Network –
a Phoenix Contact Initiative

EduNet basic equipment

EduLine PLCnext Technology Board

The EduLine PLCnext Technology Board can be used to get familiar with PLCnext technology. Digital and analog sensor and actuator technology are available directly "on-board".

EduLine Switch Board

The EduLine Switch Board is used to network EduLine Boards and laboratory applications via Industrial Ethernet.

EduNet membership sign and poster set

You will receive technology-related posters on current topics in automation technology and an EduNet membership sign.

In-person and online training sessions

Benefit from multiple training opportunities on automation technology topics. Our trainers combine the current manufacturer and user knowledge with general content.

Additional offers

Annual international conferences

phoenixcontact.com/edunet

Professional conferences at different locations offer a platform for discussion with experts and allow you to cultivate contacts with international universities. Phoenix Contact and an EduNet member university serve as the hosts.

EduNet Learning Management System (ELMS)

elms.ccad.eu

The EMS was developed to promote the transfer of knowledge between member universities and Phoenix Contact. This private member platform offers the option to develop and use educational content and teaching material together.

TechEducation Knowledge Hub

tech-education.de

The Knowledge Hub is our online knowledge and exchange platform for instructors at universities and vocational schools. All technical educational institutions can register here, regardless of whether they are EduNet members or not.
