

EduNet

Your partner for international
higher education

EduNet International Education Network

Through the EduNet International Education Network, Phoenix Contact promotes interaction and cooperation between higher educational institutions and industry in the fields of electrification, networking, and automation. With the help of the network, the automation technology expertise of users and manufacturers is integrated into the training program.

**Colleges and
universities**

EduNet

International Education Network –
a Phoenix Contact Initiative

Students

Industry

Synergies through collaboration

Studying in jointly designed EduNet laboratories supports students in their transition to the working world. The goal is to work together to develop educational innovations and content and to test them out in a real-world environment.

More than 900 training boards have been installed in EduNet labs throughout the world thus far.

Colleges and universities

- Practical laboratories with state-of-the-art technology
- Learning management system
- Professional conferences
- Free training sessions
- Research projects
- Future range of certified courses

Students

- Technical training based on state-of-the-art technology
- Future range of certified courses
- Participation in (international) awards

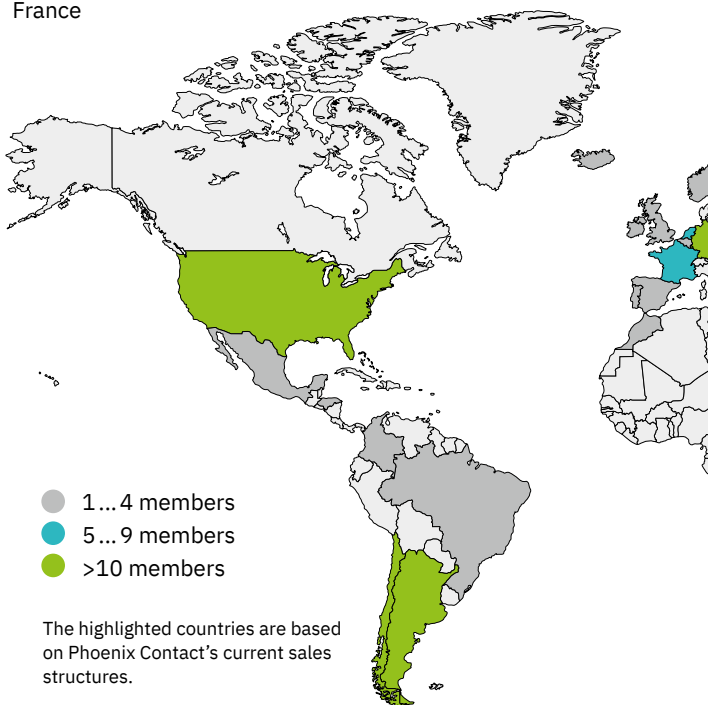

Industry

- Highly qualified graduates with up-to-date manufacturer and user knowledge
- Technology transfer
- Highly motivated training staff as partners
- Increased familiarity with technology

EduNet network worldwide

Over 150 EduNet member universities in more than 30 countries

Argentina	Germany	Poland
Australia	Great Britain	Portugal
Austria	Honduras	Romania

EduNet basic equipment

EduLine PLCnext Technology Board

The EduLine PLCnext Technology Board is ideal for learning about PLCnext Technology. Digital and analog sensor and actuator technology is available directly “on board”.

EduLine Switch Board

The EduLine Switch Board is used to network EduLine Boards and laboratory applications via Industrial Ethernet.

EduNet membership sign and poster set

You will receive technology-related posters on current topics in automation technology and an EduNet membership sign.

In-person and online training sessions

Benefit from training opportunities on automation technology topics. Our trainers combine current manufacturer and user knowledge with general content.

Additional offering

International annual events to cultivate contacts

Technical conferences in different locations provide a platform for discussion with experts and allow you to cultivate contacts with international universities and education partners.
